Subject: Catawba Nuclear Station  
Docket No. 50-413  
LER 413/93-002

Gentlemen:

On February 25, 1993, Catawba Unit 1 entered Technical Specification 3.0.3 due to both trains of the Nuclear Service Water (RN) System being inoperable. The Licensee Event Report (LER) for this event is due March 29, 1993.

At this time, Catawba requests a one week extension to April 5, 1993 for submittal of this LER. This extension period is necessary to provide time to complete a thorough investigation of the event and allow for management review of the final report.

Very truly yours,

*M. S. Tuckman*
