Docket No. 50-267

SUBJECT: ANNUAL RADIOACTIVE EFFLUENT RELEASE REPORT

Gentlemen:

Attached please find the Annual Radioactive Effluent Release Report for the Fort St. Vrain Nuclear Station.

This report covers the period January 1, 1992, through December 31, 1992 and is the first Annual Radiological Effluent Release Report being submitted pursuant to Section 5.5.2 of the Fort St. Vrain Decommissioning Technical Specifications (DTS).

It is important to note that on November 23, 1992, PSC received the Fort St. Vrain Decommissioning Order and subsequently implemented the DTS on December 8, 1992. The DTS for radiological effluents were modeled after the guidance of NRC Generic Letter 89-01 which provides for relocating the radiological effluent control requirements from the Technical Specifications to the Offsite Dose Calculation Manual (ODCM). The ODCM (attached) was changed following the guidance of Generic Letter 89-01 and to address the required radiological effluent controls necessary during the facility decommissioning.

Please contact Mr. M. H. Holmes at (303) 620-1701 if you have questions regarding this report.

Sincerely,

Don W. Warembourg
Don W. Warembourg
Decommissioning Program Director
