Withdrawal of Proposed Amendment Request

Boston Edison Company (BEC0) withdraws the proposed technical specification change request of July 24, 1992 (Letter #92-079) by this letter. The proposed change concerned the addition of LCOs and surveillances for various cooling systems during shutdown and refueling conditions. We understand the NRC intends to issue further generic guidance to the industry in this area that may require revision to our submittal. We are therefore withdrawing our submittal to avoid potential multiple submittals and the associated review costs.
