

UNITED STATES NUCLEAR REGULATORY COMMISSION

In the matter of)

NIAGARA MOHAWK POWER CORPORATION)

Nine Mile Point Nuclear Station Unit No. 2)

Docket No. 50-410

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. NPF-69, hereby requests that Section 3/4.1.3.5 of the Technical Specifications set forth in Appendix A to the License be amended. The proposed changes have been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed Technical Specification changes are set forth in Attachment A to this Application. The proposed changes (1) modify Action a.2.a of Limiting Condition for Operation 3.1.3.5 to allow the reactor operator 20 minutes to restart at least one CRD pump provided that reactor pressure is greater than or equal to 900 psig or, if reactor pressure is less than 900 psig, require the operator to immediately place the reactor mode switch in the shutdown position and (2) remove Surveillance Requirement 4.1.3.5.b.2, which requires CRD scram accumulator check valve testing once per 18 months and specifies test acceptance criteria. The proposed changes are consistent with the Improved Standard Technical Specifications and previously approved Technical Specification Amendment Nos. 39 and 6 for the Limerick Generating Station, Units 1 and 2 respectively, dated May 22, 1990. Supporting information and analysis which demonstrate that the proposed changes involve no significant hazards considerations pursuant to 10CFR50.92, are included as Attachment B.

WHEREFORE, Applicant respectfully requests that Appendix A to Facility Operating License No. NPF-69 be amended in the form attached hereto as Attachment A.
