

CARL LEVIN  
MICHIGAN

DOCKET NUMBER PR 72  
PROPOSED RULE

# United States Senate

WASHINGTON, DC 20510-2202

(57FR 28645)

March 18, 1993

Dr. Ivan Selin  
Chairman  
U.S. Nuclear Regulatory Commission  
Mail Stop 16G15  
Washington, D.C. 20555

Dear Dr. Selin:

Thank you for your letter of March 16, 1993, regarding the proposed storage of spent nuclear fuel in concrete casks at the Palisades nuclear power plant.

You made several general comments in response to my suggestions for NRC's dry cask storage requirements. These comments raise a few questions that I would appreciate the answers to, prior to the issuance of a certificate of compliance for the Palisades power plant casks.

1. Have environmental and radiation surveillance programs been developed specifically for the dry casks to be used at the Palisades power plant?

2. Has the emergency response plan at Palisades been reviewed and updated to accommodate dry cask storage safety concerns?

3. Have the Palisades' site radiation protection, site training, and security and operating procedures and programs been reviewed and modified as necessary to accommodate dry cask storage safety concerns?

Thank you for your assistance.

Sincerely,

Carl Levin
