Docket No. 52-002

Attn: Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: System 80+TM Inservice Testing of Pumps and Valves

Reference: ABB-CE Letter LD-93-047, March 17, 1993, Inservice Testing

Dear Sirs:

The reference letter transmitted a summary of the inservice test program for pumps and valves. Subsequently, NRC staff requested that full-size copies of CESSAR-DC figures (Piping & Instrumentation Diagrams) listed in that program summary be transmitted to Brookhaven National Laboratory to support completion of NRC review of the program. This letter confirms that those full-size P&IDs have now been shipped.

If you have any questions, please call me or Mr. Stan Ritterbusch at (203) 285-5206.

Very truly yours,

COMBUSTION ENGINEERING, INC.
