Subject: Submittal of Revision 6 to the Fermi 2  
Updated Final Safety Analysis Report  
and the Annual 10 CFR 50.59 Safety  
Evaluation Summary Report

Pursuant to 10 CFR 50.71(e) and 10 CFR 50.59(b)(2), Detroit Edison hereby submits Revision 6 to the Updated Final Safety Analysis Report (UFSAR) for Fermi 2 and the annual Safety Evaluation Summary Report.

The signed original and ten additional copies of the UFSAR, Revision 6, are enclosed; one copy will be submitted to Region III and one copy to the NRC Resident Inspector. The UFSAR contains changes made since submittal of Revision 5 in March 1992 and, as a minimum, describes the plant configuration through November 7, 1992. Changes associated with Revision 6 are annotated by revision bars in the appropriate margin marked with a "6". All revised pages are marked Rev. 6 3/93 or Rev. 6 4/93. The discussion of the changes to the Quality Assurance Program is being sent under separate cover.

UFSAR, Revision 6, contains the changes resulting from the approval of Fermi 2 Technical Specifications Amendment 87. Amendment 87 authorized Detroit Edison to increase the maximum reactor core power level from 3293 Mwt to 3430 Mwt.

Also enclosed is the annual Safety Evaluation Summary Report containing a brief description of changes to plant design, procedures, tests, experiments, and the UFSAR.
