Washington, DC 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES) - UNIT 1  
DOCKET NO. 50-445  
ENVIRONMENTAL PROTECTION PLAN  
CORRECTION TO ANNUAL ENVIRONMENTAL OPERATING  
REPORT FOR 1992

REF: TU Electric letter TXX-93180 from William J. Cahill, Jr.  
to the NRC dated April 30, 1993

Gentlemen:

TU Electric has determined that the following correction is required to the CPSES Unit 1 Annual Environmental Operating Report for 1992, which was submitted via the referenced letter.

On page 4 of 9 of the attachment, Section III.A.3, Surface Water Treatment System Operation, stated that 25,000,000 total gallons were processed during 1992 for use as station make-up water. TU Electric has subsequently determined that this number of total gallons does not include the additional water processed through vendor-supplied equipment for station make-up water. The actual gallons processed for use as station make-up water by the Surface Water Treatment System (including vendor-supplied equipment) for 1992 is 41,400,000 total gallons.

If you have any questions, please contact Richard S. Berk at  
(214) 812-8952.

Sincerely,

*William J. Cahill, Jr.*

William J. Cahill, Jr.
