SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)  
DOCKET NOS. 50-445 AND 50-446  
SUBMITTAL OF LICENSE AMENDMENT REQUEST 93-003  
CONTROL ROOM HVAC SYSTEM

Gentlemen:

Pursuant to 10CFR50.90, TU Electric hereby requests an amendment to the CPSES Unit 1 Operating License (NPF-87) and CPSES Unit 2 Operating License (NPF-89) by incorporating the attached changes into the CPSES Units 1 and 2 Technical Specifications. These changes apply equally to CPSES Units 1 and 2.

The proposed changes revise the CPSES Units 1 and 2 Technical Specification 3/4.7.7 and its associated BASES by replacing the requirements associated with the Control Room HVAC System with requirements related to operation of the Control Room Emergency Filtration/Pressurization System and Control Room Air Conditioning System. These technical specification changes are consistent with the requirements of Westinghouse Standard Technical Specifications (NUREG-1431) issued on September 28, 1992.

Attachment 2 provides a detailed description of the proposed changes, a safety analysis of the changes, and TU Electric's determination that the proposed changes do not involve a significant hazards consideration. Attachment 3 provides the affected Technical Specification pages from the operating licenses, marked-up to reflect the proposed changes (NUREG-1468 through Amendment 14).

TU Electric requests approval of this proposed license amendment by June 30, 1993, with implementation of the technical specification changes to occur within 30 days after NRC approval.

In accordance with 10CFR50.91(b), TU Electric is providing the State of Texas with a copy of this proposed amendment.
