Atomic Energy Commission
Atomic Safety & Licensing Appeal Board
Washington D.C.
Docket # 50-346

Dear Sirs,

This letter is in respect to the motion of Glen Sauer that was denied at the close of the Davis-Besse hearings. This motion was to give him time to recover from his illness that kept him from appearing the last day of the hearing. I feel that if at all possible someone should check with the man on the final part of his cross examination before you make a decision on his appeal. I believe that Mr. Sauer feels that he has some very pertinent information that should be brought up before the licensing board makes

the final decision on the Davis-Besse Nuclear plant. I feel that the licensing board may have been very fair at this hearing but I now believe that if there is any chance that Mr. Law has information that would affect the decision of this board it should be considered before final action is taken on the construction license.

Due to the so-called 'credibility gap' that has developed due to the power plants information and tactics used prior to this hearing the people who live near the installation find it hard to believe any thing that has been explained by the applicants & the A.E.C. commission. If there would be a chance that Law could get his testimony completed some way or another I believe that the people in the area would feel a little better about the licensing of it.

have been held in part Clinton.
I know that there is a large
expense involved in sending the
groups concerned to part Clinton
but if this is not possible maybe
Mr. San could be called to Washington
to finish his testimony. I believe
that if you talk this over with
Mr. Walter Skallup, the chairman
of the board, that you will find
that this letter is written
with the deepest concern for
my neighbors and friends of
the immediate area. Please try
to do all that is possible to get
this problem resolved. Thank you.

Sincerely
James H. H. H.

GENTLEMEN:

THIS MESSAGE CONCERNS PROPOSED FACILITY FOR NUCLEAR POWER ON
