Washington, D.C.

Dear Sir:

My family and I share the concerns voiced in this letter from our local newspaper. We, too, took the tour of the McGuire facility and are not reassured. Please reopen hearings and move to delay opening the plant until these major problems with evacuation procedures have been overcome in fact and not just on paper. Too, I would like to have responsibility for such emergencies more clearly located. It seems quite stupid to leave that hanging while allowing a utility to risk all of our lives with its operations.

Sincerely,

Pat Edmondson
