Subject:

This L.E.R. concerns setpoint drift of the two RCIC Turbine Steam Line High Flow DPIS Instruments due to setpoint drift. The applicable Technical Specification is Table 3.2.B.

While at full power, surveillance testing on DPIS 2-13-83 and DPIS 13-84 (redundant RCIC turbine steam line high flow DPIS instruments) revealed that the setpoints exceeded Technical Specification Table 3.2.B limit of 450 inches of water by 1.3% and 0.5% respectively.
