

Mr. John F. Alston
Chairman
U.S. Nuclear Regulatory Commission
Washington, D.C.

Nov. 10, 1980

DOCKET NO. 50-289
PROD. & UTIL. FAC.

Subject: Docket No. 50-289 SF
THI Unit 1

Dear Mr. Alston,

My husband and I have a family of 5 young children (and one plus any day) and we reside approximately a mile from the Three Mile Island Nuclear Power station.

We are writing to express our support for the restart of THI Unit I. Unit I has one of the best operating records for nuclear power plants in the nation. It was not damaged by the Unit II accident; nor has it caused any threat to our environment.

To let that potential power just sit there while our country struggles in an energy crisis is ridiculous. We believe that the safe use of nuclear power will have to play a major role in our country's energy supply.

THI gave our society a chance to learn and progress. Let's meet its challenge and move ahead. The restart of Unit I is one step forward in our endeavor.

Very truly yours,

Dee Tucker
