DOCKET NUMBER 50-289  
PROD. & U.S. PAC...

January 3, 1981

The Honorable Joseph M. Handrie  
The U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Commissioner Handrie:

At a time in our Country's history when low cost energy is so important in the control of inflation and the reduction of dependence on foreign sources, I believe that the Three Mile Island power plant should be put back into operation just as soon as possible.

Some of our fellow Americans, through ignorance, oppose that action. This, I feel, is a temporary stance not based on fact. I encourage you to lend your full support to the restart of Unit No. 1 and to the repair and use of Unit No. 2.

Very truly yours,  
Albert T. Lagemann.
