

DOCKET NUMBER **50-289**  
PRCO. & UTIL. FAC.

126 F Street S.W.  
Ephrata, Wash. 98823  
January 19, 1981

The Honorable John F. Abear  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sir

As a citizen and a shareholder in the General Public Utility Corporation, I urgently request early action on restarting nuclear power plant TMI. Further delays do not appear to be technically justified from either an operating or safety standpoint. Such delays require additional useage of foreign oil imports, added costs to the power users, and additional financial burden to consumers and investors.

Decisions should be made solely on technical and safety requirements and not political concerns of the anti-nuclear forces such as the Ralph Nader, John Fonda and others who are poorly informed and providing a dis-service to the nation.

Sincerely  
Allen B. Howell
