Commissioners,

It is unbearably sick to think
that trustees of our lives have given the
go ahead to seal the fate of Central Pa. All
the work that cooler heads have done are
all for not. The testing of Unit I at TMI
is intolerable. Allowing Med-E to continue
without hearing our case is a crime that
you gentlemen will have to live with, just
as the physical & psychological scars we will
live ~~with~~ die with. I hope you are proud
for we will die hard.
