Honorable Commissioner Bilinsky

I am a small shareholder of two Penna. utilities, one of which is General Public Utility. I am also an advocate of nuclear energy as a source of supplying cheap energy and reducing our dependence on foreign oil. I am also a retired technician who worked for a highly technical company who believe we in this country have the knowledge and know-how to produce nuclear energy safely. I believe there are groups of people in this country who without reason unjustly condemn the nuclear industry. These dissident groups along with the news media are partly responsible for causing irrational mass hysteria against the nuclear industry. I am sure you are more aware than I if we are to reduce our dependence on foreign oil we must use all forms of energy. The unnecessary delay of the restart of TMI-1 has caused more than necessary hardship on G.P.U.'s customers. The delay has also forced G.P.U. to the brink of bankruptcy. I urge you to recommend the restart of TMI-1 without further delay. I wish to thank you for your consideration in this matter.

Sincerely

John J. Sattley
