JAMES F. AWEARNE  
CHAIRMAN  
US NUCLEAR REG. COM.  
1717 H STREET, NW  
WASHINGTON, DC 20555

TMI-UNIT 1  
REF: DOCKET 50-289 SP

Let's cut the red tape and bureaucratic  
delays relative to the TMI Unit #1 and  
put it back in operation where it belongs.  
By your delays, you are rendering  
America helpless in the hands of the  
OPEC members who would have us down  
on our hands and knees begging for their  
oil at any price. Where is the urgency?

All other countries such as France,  
Japan, Britain, etc. are progressing  
rapidly in nuclear power while we  
spin our wheels in bureaucratic misadventure  
policy of do-nothing. This is a disgrace.  
It should be pointed out that:

- (1) nuclear power is safe, inexpensive & needed
- (2) TMI-1 is not TMI-2 & has been underway
- (3) NRC is taking too long to make a decision
- (4) TMI-1 must be restarted without delay

Very truly yours, J. F. Awearne
