Jan. 29-1981

Mr. James F. Kearney
Chairman N. R. E.
Dear Sir:

It would seem that TMD 1 has been down
long enough - it was proven safe before the accident
at TMD 2.

After ~~the~~ modification it should be
safer than before. It doesn't seem right that your
commission should push G.P.U. to the brink of
bankruptcy because Met. Ed. can not start
TMD 1 - nuclear power is necessary - why
not give them permission to start this
activity?

Sincerely Paul F. Weber
