

DOCKET NUMBER 50-239
PROD. & UTIL. FAC.

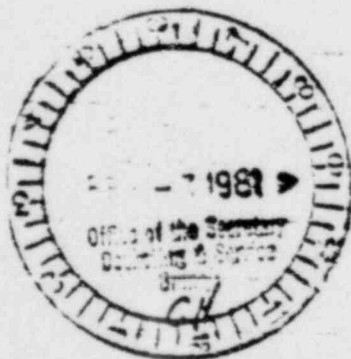

JUN 22 1981

Dear Mr. Ahearn,

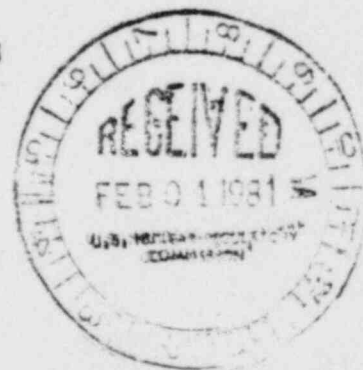

I feel TPII-1 should be restarted. The facility has been modified, is as safe, or safer, than many other nuclear plants now operating.

As a citizen, Korean Veteran and taxpayer I see no reason for delay. Nuclear power is safe, needed and inexpensive. It is all America has to offer against foreign blackmail via petroleum products.
Thank you.

Charles Ebinger
