

DOCKET NO. 50-289  
PROD. & UTIL. FAC.

Clingens  
42 Woon Circle  
Port Chester, N.Y. 10573  
Jan. 30, 1981

Mr. James F. Ahearn, Chairman  
U.S. Nuclear Regulatory Commission  
1717 H. Street N.W.  
Washington, D.C. 20555

Dear Sir:

Don't you think it is time you  
stopped pussy-footing around  
and solved our energy problem  
logically, quickly, practically  
and realistically for the  
benefit of the people of the  
United States of America?

Why must our country be  
dependent on foreign oil  
when we were the country to  
develop nuclear power and  
all European countries are

S 1/0

—  
surpassing <sup>2</sup> us in its use?

Nuclear power is safe,  
inexpensive and needed.  
You have practically put Three  
Mile Island out of business  
when their "Unit 1" had  
nothing wrong with it, applied  
its additional safety standards  
beyond other nuclear plants,  
and was forced to remain  
closed. This is irrational,  
unjustified and discriminatory.  
If you do not act immediately  
and allow G.P.U. to open their  
Unit 1 reactor — the company  
may be forced into bankruptcy.  
Are you people sitting on  
your hands?

What you should be

—

3

doing is encouraging all  
electric companies to build  
safe nuclear plants - and  
the sooner, the better!!

Put 3 Mile Island Unit 1  
back to work, encourage  
nuclear building in our  
country and make us  
independent of foreign  
oil and Arab dominance.  
It's time you acted for the  
good of all our people.  
It's time everyone in the U.S.A.  
was considered - work for the  
good of your country - put  
TMI-1 back to work without  
further delay!!!  
Thank you. Sincerely,

RS [up] to Doclet 50-3845F, TMI-1
