James H. Adams  
Chairman  
U.S. Nuclear Regulatory Com.

Dear Sir,

I believe the "utility people" of this country are devoted to reliability. Without question they are concerned about nuclear safety. In fact, the various activist groups who spread scare statistics to an uninformed public, these groups by in large send to mail cover, no work. I am at the expense of the utilities to correct the bill paying problem.

Please act swiftly to remove TMI-1 (Transit 50-28952) to remove operation, since it has been modified. The working public is present in mass subject to further waste. Dollars are being lost.

Sincerely,

W. Hampstone  
3727 Woods Rd.  
Westie, Mich 49251
