James F. Ahern  
Chairman  
U.S. Nuclear Regulatory Comm.  
1717 H Street N.W.  
Washington D.C. 20555

Dear Mr. F. Ahern

Referring to the accident at Three Mile Island  
utility plant at Middletown, Pa.

I feel strongly that Unit-1 should be restarted  
(Docket 50-2845 - Unit 1) as it doesn't make sense  
to shut the other units,

I feel this is causing a hardship on the customers  
and stockholders

Nuclear energy is not as bad as some people are  
trying to impress the public, after all no one was  
hurt, at least I have not heard of any injuries.  
From what I understand there was some injury  
with construction of utilities. I was a truck driver  
and served a steel room at a local utility plant.  
Everyone in a while I would hear of an injury and  
this is only one plant.

I am closing I repeat I feel strongly that unit-1  
should be restarted, we need, other countries  
back and I understand France is way ahead  
of us

Thank you.

Al Rosenof
