James F. A. Williams, Chairman  
US Nuclear Regulatory Commission  
1717 H Street, N.W.

MESSAGE:

Washington, DC 20555

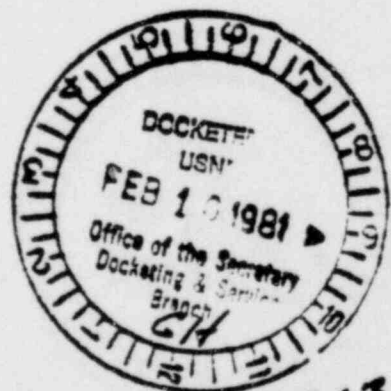

DATE

2-5-81

TMI-1 was not damaged in the  
accident of March 1975. Some safety  
corrections have been made. Others can  
be made when the plant is operating.  
It is imperative that this  
generating plant be started out once  
will save \$500,000 a day in oil or coal  
costs, as well as eliminate atmospheric  
pollutants.
