PROD. & UTIL. FAC.

Mr. J. A. Charnick  
U.S. Reg. Comm.

Dear Mr. Charnick

Re: Three Mile Island Unit

In my opinion the continued decision to keep this unit closed is unjustified. The majority of people in the area as well as all over the country fear nuclear power as the only source to keep us remove or rid us from dependency on Middle East oil. We can find ourselves shut off from these supplies at any time and the resulting shutdown of American industry would cause untold damage to our economy. There has been no deaths and injury that I am aware of from nuclear power, the incident has resulted from Three Mile Island and is far safer now than ever. I've applied the same question to the automobile, airplane & even fireworks on the 4th of July, think of the lives it would have saved.

Very truly yours,  
Charles A. Wagner
