Dear Sir;

I am told that you are now holding a hearing regarding the reopening of TMI-2 Nuclear Power Plant..

It seems to me that this should have been done quite awhile ago. This plant was not damaged by the trouble with TMI-2

and it has also been modified since then. This energy is extremely important and I am sure is perfectly safe. the closing of it has cost the company that owns it approximately 500,000. per day to keep it closed and to furnish power from other sources. This is a LOT OF MONEY.

I surely hope that you will take immediate action to allow this plant to reopen immediately.

Thank you sincerely

Burton Chaney
