

7-25-1981
Mr James A. Brown
Chairman
U.S. Nuclear Reg Comm.
1717 H Street, NW
Washington, D.C.

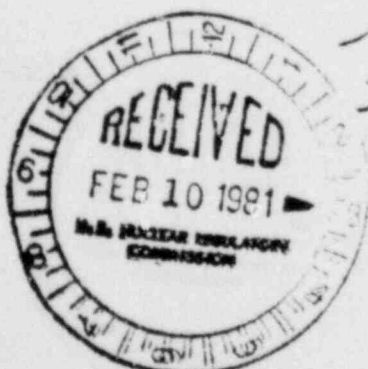

DOCKET NUMBER 50-289
PROD. & UTIL. FAC...

Dear Sir -

What does it take to get your
commission to allow the Three Mile
Island Unit #1 ^{To get} started? I fail to under-
stand after the last Election when the
people spoke to the ^{voice of} less
narcissism and more ^{production & industry using our own} resources.

When we are at the mercy of the
OPEC Countries for oil production and
we have vast quantities of coal and
could have nuclear for power genera-
tion we need to get going!

As an Engineer I have read the
IEEE report of the Three Mile Island
break down and I find it far easier
to correct than many other things
as far as safety to people -

Sincerely
Fred Behr
