Dear Mr. Ashmore:

Re: NRC L.F. 50-28951

7012 West Washington, Pa.

We need nuclear power. TMD - I wish you had given TMD. 2
NO DELAYS!

It's not the impossible. It's totally without risk. There are no
less such a thing and there never will be.

We need this country to be day if there had been the Nuclear Regulatory
Commission written in Edison's code day. We know their
invention have killed thousands of people. But we don't stop produc-
ing nuclear power & let's not get it because of it.

We need some source of power NOW!

Respectfully,
Mr. Thomas Ashmore
