James P. Shaine Chairman  
U.S. Nuclear Regulatory Commission  
1717 H Street N.W.  
Washington DC 20555

Dear Sir:-

We think it is a crying shame the way  
and your Committee have tied up the Three Mile  
Island Unit No 1 in Pennsylvania. This unit never  
had any problem. Has been completely checked  
and your Committee refuses to release it to go  
back into service. Why?

We are retired, and a stock holder and  
depend on dividends to supplement our Sec. In  
As long as this unit is down they have to buy  
from Conestoga Companies, and can not pay dividends

Nuclear Plants have never lost a life in  
20 years of operation. A reply will be appreciated

Yours Truly
