

20-3, 1981

Dear Commissioner - Lucius

DOCKET NUMBER 50-289
PROD. & UTIL. REG.

The real reality that your staff has recommended that Unit #1 should be allowed to go on line at 3, sweet power level because there may be brownouts.

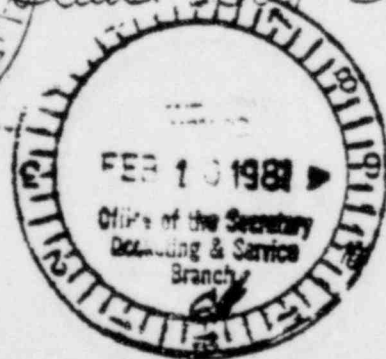

The NRC stated that there should be a hearing before Unit #1 should ever be on line. Well the hearing is not over and some of the most important issues have not been heard. One issue, psychological stress, has been rejected. I live here and see the strain on the people in my life. It is very much an issue. Please do not allow Unit #1 to start before the hearings are over. Let the intervenors state their case then decide!

Wish trying to play by your rules
Please let us finish this game.

DSO3
9/10

Sincerely,

John Smith
