DOCKET NUMBER
PROC. & UTIL. FAC. 50-369-OL-370-2

Robert M. Lago
Chairman, Atomic Safety and Licensing Board
U.S. Nuclear Regulatory Commission
Washington D.C. 20555

Dear Mr. Lago

I am a teen living in Charlotte, North Carolina, and am concerned about the McGuire plant north of Charlotte. Licensing this plant to operate near our city, I feel is dangerous, and I think the board for re-opening the licensing hearings. The plants containment is more likely to breach if an accident such as that at Three Mile Island occurs and I would like to know what effect the release of radioactive steam and gases would have on Charlotte.

I think that it is important that the Duke Power file an Environmental Impact Statement for such an accident because of the effect it will have on the community.

Sincerely,
Nathan Fennell
Charlotte, N.C.
