& UTIL FAC

Dear Sir,

It has come to my attention  
that so far Duke Power has not  
released an environmental impact statement  
on what would happen in the case  
of a serious failure of the Three Mile  
Island plant. I would indicate it  
very much of our interest  
them to do this. I hope to see  
the hearing on this. I think  
I think that this statement is quite  
vital to the issue and I don't think  
that it is reasonable to decide on whether  
or not to license it without knowing  
the extent of possible damage in the  
event of a total failure.
