

50:289 (Plant) February 13, 1981

Dear Mr. O'Brien,

Please accept this letter as registering my opinion that Metropolitan Edison should not be allowed to restart Unit 1 at Three Mile Island. Metropolitan Edison has proven that it is not capable of preventing another nuclear accident such as happened with Unit 2. It is shocking that they have asked permission to restart before the hearings on the subject are completed.

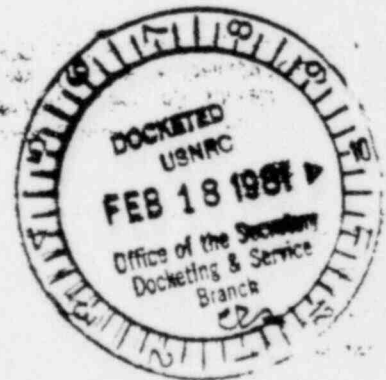

Please advise me that you will assist in this process in any way.

Sincerely yours,

(Miss) Ruth Lawrence
