

2/12/81
 Dear Sir - I agree that
 Unit I at TMI should NOT
 be restarted. Since the NRC
 since the nuclear industry is
 not capable of running nuclear
 plants and ~~do~~ NOT know
 how to dispose of nuclear
 wastes, nor how to transport
 wastes ("There will be accidents"
 says the Dept. of Transportation)
 and since our country does
 NOT need electricity from
 nuclear plants, and since the
 cost of electricity from nuclear
 plants is the greatest if you
 include \$40 billion tax subsidy
 + include the costs of shut-down
 (not to mention that no one
 knows how to shut a nuclear
 plant down): STOP ALL
NUKE POWER PLANTS NOW.

SAVE WATER
 SAVE A TREE
 SAVE TOP SOIL
 SAVE A PLANET

SHUT DOWN NUKER PLANTS
 READ ROVINS' Nuclear / WAR NO

Mr. John Ahearn, Ch.
