

Feb 12, 1981

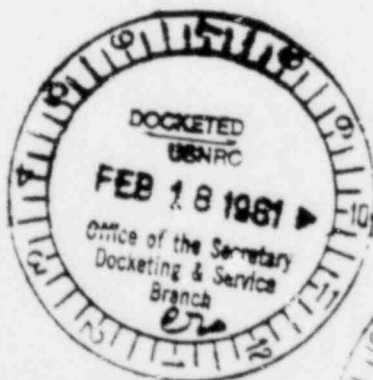

MR. JAMES A HEARNE
CHAIRMAN
U.S. NUCLEAR REGULATORY COMMISSION

The three Unit 2 containment
vessel - 1 was closed by the
Nuclear Regulatory Commission,
was not involved or
damaged in the accident at
TMI-2 on March 1979.

I believe the government
decision to keep unit 1
closed, is administrative
and unrelated to the
nuclear power or safety concerns
and needs. Unit 1
is different from TMI-2.

The NRC, by the course of
costing millions of dollars
to Metropolitan Edison and
its customers by refusing to
grant license to restart
TMI-1.

Yours truly
Steven P. Volzgard
204 WALNUT ST.
SOUTH GATE, CA 90187.
