

DOCKET NUMBER 50-289 (Restart)
PRMO. & UTIL. FAC.

Chairman Eakin
Route 2 Box 654
Facklandtown, N.C. 67645

Mr. John A. Eakin
U.S. Nuclear Regulatory Comm.
Washington, D.C. 20555

Dear Sir;

I understand that there is
pressure on your Commission to
retract unit one at Three Mile
Island. I do not believe this
would be wise in light of all
that has happened at Three Mile
Island, and especially while the
spill from the heat exchanger is
being cleaned up.

I am also concerned about
the new plant that is being

H 8102200565

built in Mo. I understand that they are planning to dump radioactive waste into the Mo. River. This would poison the water supply for such cities as Jefferson City and St. Louis, as well as all the other cities on the lower Mississippi including Memphis and New Orleans. I do not believe any ~~radioactive~~ ^{toxic} plants should be put ^{in service} until a safe method of disposing or storage of atomic waste has been found.

Yours Truly,

Charles E. Darling
