

DOCKET NUMBER 50-289 (Restart)
PROD. & UTIL. FAC.

1200 Norfolk Ave.
W. Sacramento, Ca.
95691

Feb. 12, 1981

Mr. John Ahearne, Chairman
US Nuclear Regulatory Commission
Washington, D.C.

Dear Mr. Ahearne,

Reports coming from Three Mile Island have been disturbing.

We urge you not to restart Unit I, the twin of the damaged reactor. We understand that many experts have testified that the plant should not be restarted.

Will the commission allow thousands of gallons of radioactive water to be dumped ~~into the~~ ^{into the} Susquehanna River? Where will the people get suitable drinking water? Surely the N.R.C. will take a responsible position on these issues!

Yours Truly
