PROD. & UTIL. FAC.

50-289 (Restart) 15061 James  
Oak Park, Michigan  
48237

Feb. 10, 1981

Mr. John Ahearn, Chairman  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Ahearn,

I am writing to you as a concerned citizen about the health and safety of other U.S. citizens.

I understand that Unit 1 of the Three Mile Island nuclear power plant may be restarted. In view of all that has happened with this plant mal-functioning before, whether by human error or defect parts or whatever, I do not feel it is safe to use any part of it.

Peoples lives are too important for others to take chances with all in the name of "guesswork". Isn't it the right thing to do - to be safe rather than have to say I'm sorry afterwards.

Sincerely,  
Mrs. Lydia Cohn
