The Honorable John F. Ahearne, Chairperson
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Commissioner Ahearne:

May I urge you to help keep G. P.U. as a viable source of electric power by allowing them to restart Unit #1 at T.M.I. as soon as possible. A bankrupt utility helps no one.

It seems I can't turn on the radio or tele vision or look at a newspaper without seeing or hearing that imported energy is one of our main sources of inflation.

It seems wrong to keep TMI 1 shut down when if restarted soon it could help keep G.P.U. alive and as a result help our country and its people.

Sincerely,

Florence Olen
