

50-289 (Restart)

Mr. John Ahearne
Chairman
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Ahearne,

I am concerned about the plan to restart
Three Mile Island Unit I. The original clean-up of the
damaged Unit II, one projected to take 4-5 years now appears
to require a much longer time frame.

I feel strongly that Unit I, the turn of damaged
reactor, should not be restarted at this time.

Sincerely yours
Samuel Ziffer
