

DOCKET NUMBER 50-289 (Restat)  
PROD. & UTIL. FAC.

3304 Illinois Ave.  
Louisville, Ky. 40213  
Feb. 14, 1981

Mr. John Ahearn, Chairman  
U.S. Nuclear Regulatory Comm.  
Washington, D.C.

Dear Mr. Ahearn;

I am writing you as a "soon-to-retire"  
individual who owns stock in the  
General Public Utilities Co. I had invested  
in this utility (and others) to supplement  
social security benefits in my retirement.

Now, due to the unfortunate accident at  
Three Mile Island and a very lengthy  
delay on the part of the N.R.C. in  
approving a constructive cleanup program,  
and, approval for the other unit to be  
activated, I find myself concerned and  
angry about the lack of action at N.R.C..

I do not minimize the gravity of the  
situation, nor, do I wish to be in your  
position. I just want to express my  
"selfish" concern about the lack of  
action and want "my" Company to  
return to a solvent position.

Thanks for listening!

Sincerely  
Bernard E. Busch
