Mr. John F. Ahearne  
Chairman Commissioner  
U.S. Nuclear Regulatory Commission  
1717 H Street, N.W.  
Washington, D.C. 20555

Subject: Docket 50-2895  
TMI - Unit 1  
Middletown, PA

Dear Mr. Ahearne:

It is my understanding that Unit 1 at Three Mile Island was not damaged by the accident at Unit 2. Further, I understand that it could operate independently of Unit 2 and could be producing power much needed by the area it was originally designed to serve.

It seems incredible in these days of "power shortages" and "conservation" that the NRC is dragging its feet on permitting Unit 1 to get back in service.

I respectfully request that you and the NRC give full attention to TMI - Unit 1 and move with all possible speed toward implementing the restart of this facility.

Sincerely,  
George E. Foote  
(Mrs. George E. Foote)
