

3-2-81

Dear Mr. Ahearn,

Why have you not given the go-ahead to Reactor The undamaged UNIT #1 at Three Mile Island?

This plant has been upgraded and is now ready to produce electricity. When and if you allow unit 1 to operate the utility will save 12 to 14 Million dollars per month thus giving rate payers at TMI lower electric bills. Is this some type of vendetta on your part as a conspiracy against Nuclear power generation? You have at this late date no valid excuse not to allow operation of this plant!! You have assumed the role of an Anti-nuclear obstructionist with bureaucratic power. I await your reply.

Respectfully  
Fred Brown
