

Mr. Smith,

I think this three mile island deal has been talked about in public, on radio, T.V. and in the newspaper long enough, now its about time something is done about it, I can see no reason at all why T.M.I. - No. 1 - Unit cannot be put on line, there are other nuclear generation stations build in this country just like T.M.I., If they can operate so can T.M.I. - #1 Unit, So I thing T.M.I. #1 Unit should be checked out thoroughly and corrected and the Equipment is safe to operate, then bring it on line.
