Atomic Safety and Licensing Board

JMG-1 (Docket 50-289)

U.S. Nuclear Regulatory Commission

Attention: Chairman Ivan Smith,

We're asking for reasons of why JMG-1 shouldn't obtain operating abilities. We're not any further complaining, instead let us term it major concern for the upcoming human race.

Starting from our birth, man has exceeded his capabilities of extraordinary acceptance to not only himself but, to others of the same origin. No questions pursued in most instances due to life being made easier to one individual. In the same token of easiness, he is extending so far to experience all advance he has already fulfilled.

Through all man's turning century to century his one vision is a color of green, turning definitely not of nature's lovely, physics. Instead of living

with nature. he works vigorously  
against it. Until the fuse he has set  
for himself finally runs out.

Fred is finally taken wild and  
each and every mold of us and things  
have been sold without our knowledge.  
We feel the time has come to sit,  
talk and think right now today,  
before we the people are made to  
pay for man's own ignorant destruc-  
tive gruesome doings.

What man should we need,  
when he looks about him and  
his definitely diminishing nature  
and his temporary blindness can  
go to a permanent <sup>and</sup> destruction  
of this complete earth.

Thank you,  
Mr. & Mrs. Donald Jones  
family
