Nuclear Regulatory Commission
Washington 25, D.C.

Gentlemen:

You still have not approved
the re-opening of Gen. Public
Utilities TMI Unit 1, even though
it was not damaged. Why don't
you treat it in the same manner
as the other seven reactors of
similar design?

Are you trying to turn off
the lights for the customers and
lower stockholders of General
Public Utilities — like the
included comic by Goosemyer?

Sincerely

Wayne Martin
