Dear Chairman Ahlborn,

The reports I read about the Nuclear Regulatory Commission deciding to prolong the decision-making process on Diablo Canyon Nuclear Power Plant, really disappoint me. How long? In the name of safety can you prolong the hearings when they have been too long already?

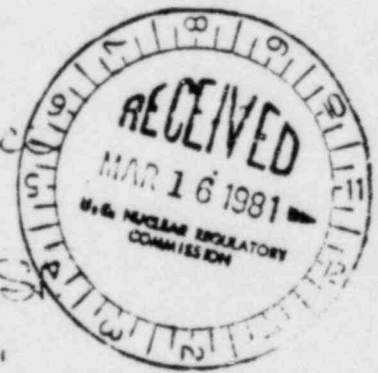

Every day that plant sits idle will cost P. S. & E. customers \$2 1/2 million!!

For that price tag, you better have a lot of safety improvements to offer. Get it over with. Stop talking and let us have our electricity.

Yours,
Carol Prince
