Nuclear Regulatory Commission

I believe that the Media + Press present  
a false picture of 3 Mile Island.

The European countries have used  
this excellent source of power + we are  
far behind. The very vocal and noisy  
left who do not want us, as a Nation,  
to take our rightful place in the world,  
are stirring up all this emotionalized  
propaganda.

Please listen to scientists who  
are responsible and understand the  
problems involved. Pay for and ob-  
tain responsible people to man the  
controls instead of poorly trained and  
irresponsible workers in key posts.

Have your meetings without the  
news media present & issue exact  
information to them which must be con-  
cisely quoted. Thank you.
