Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Schwencer:

In the Matter of the Application of)
Tennessee Valley Authority)

Docket No. 50-328

TVA has found it necessary to revise the Preoperational/Startup Test Program stated in the Sequoyah Nuclear Plant Final Safety Analysis Report (FSAR). Ice condenser system tests will be conducted through fuel loading and completed before Reactor Coolant System heatup.

Please note a correction to my letter to you dated April 21, 1981. We intend to conduct the Reactor Protection System Operational Test before fuel loading as it was originally scheduled.

Revisions to FSAR Tables 14.1-2, Preoperational Test Sequence, and 14-1-3, Startup Test Sequence, will be included in the FSAR.

If you have any questions, please get in touch with D. L. Lambert at FTS 857-2581.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Regulation and Safety
