Docket No. 50-346

License No. NPF-3

Serial No. 730

July 6, 1981

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz, Chief
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

This letter relates to two items in NUREG 0737 "Clarification of TMI Action Plan Requirements" as they concern the Davis-Besse Nuclear Power Station Unit No. 1.

Item I.A.1.1.4 is the description of the long-term Shift Technical Advisor (STA) program. As described in Toledo Edison letter of December 31, 1980, work is going on with Ohio State University to develop training efforts such that the STA's function could be incorporated into the shift organization without requiring a dedicated individual.

Item II.B.4 deals with training for mitigating core damage. This program is being handled on a B&W Owners Group level and has been scheduled for complete implementation by October 1, 1981.

Details of both of these programs are still being developed. Toledo Edison will submit the resulting programs description for these items by August 31, 1981.

Very truly yours,

R. P. Crouse / ucl
